SUMMARY

Motivated Computer Science Engineering student with basic knowledge in programming and embedded systems, and hands-on experience in developing academic and real-world projects. Interested in building practical applications and improving technical skills through continuous learning.

PROJECTS

AI Smart Dustbin – Smart Waste Management System

- Developed an AI-based system to classify and manage waste efficiently.
- Integrated sensors and automation for real-time waste segregation.
- Built as part of a hackathon project.

AI Industrial Monitoring – Real-Time Monitoring System

- Designed a monitoring system using RTSP for real-time industrial surveillance
- Implemented data tracking and alert mechanisms for anomaly detection
- Award-winning project at TN Impact 2026

ALERTLY ResQ – Emergency Relief Platform

- Developed a platform to assist in emergency response and resource coordination
 - Focused on real-time communication and accessibility
-

EDUCATION

B.E. Computer Science and Engineering

2024 - 2028

Rajalakshmi Engineering College (2nd Year)

Maharishi Vidya Mandir Senior Secondary School

Higher secondary - 84%

2022 - 2024

TECHNICAL SKILLS

Programming: Python, Java, C (Beginner level)

Technologies: AI/ML, Embedded Systems, IoT

Tools: Git, GitHub

Other Skills: Problem Solving, Debugging, System Design

INTERNSHIP EXPERIENCE

Data Science Intern – G-Tech Computer Solutions (2 Weeks)

- Worked on analyzing customer food ordering datasets to identify patterns and preferences
 - Performed data cleaning and organization to improve data quality
 - Conducted basic data analysis using Microsoft Excel
 - Studied recommendation systems for data-driven decisions
-

ACHIEVEMENTS

- Special Prize Winner – TN Impact 2026 (AI Industrial Monitoring)
